

BOSS DOOR

HIGH SPEED RUBBER DOOR — BUILT TO LAST

BOSS

DESIGNED FOR YOUR INDUSTRIAL NEEDS

Weather stripping and curtain support angles are designed to fully seal door opening.

Safety vision stripes are added to our curtain for better visibility.

Our shock absorbing extrusion has been designed to allow the curtain to be impacted and knocked out of the curtain support angles with no damage to the curtain allowing for a longer curtain life.

Various motor applications available upon request. Door speeds up to 48" /sec open, 30" / sec close, depending on size and configuration.

Impact plates.

Weather stripping and curtain support angles.

ILLUMINATED BOTTOM BAR

Patent Pending

Saving your company time and money with our impact plates
and illuminated bottom bar design.

Boss Door was designed with the customers' needs in mind. The bottom bar will not be missed when vehicles arrive. The red LED flashing lights are a great safety feature for all applications.

Our impact plates are designed to break away upon impact of the door to save labour and material costs.
